INTRODUCTION TO AGRITOURISM
WHAT IS AGRITOURISM?

- Business of establishing farms as travel destinations for educational and recreational purposes.

- Farming-related experiences enjoyed on a farm or other agricultural setting for entertainment or educational purposes.

Variety of terms & labels used interchangeably.

Recent research suggests ‘Farm Visit’ may be best understood by stakeholder groups

This is NOT to suggest the term agritourism should not be used but rather some additional education & communication may be required to ensure the intended audience understands the term and expectations.

(Arroyo, Barbieri, & Rich, 2013)
Agritourism includes a wide range of activities:

- On-farm sales of agricultural products (direct-to-consumer)
  (E.g., farm markets, pick-your-own operations)

- Educational tourism
  (E.g., School tours, winery tours, farm work experiences)

- Entertainment
  (E.g., Hay rides, corn mazes, petting zoos, haunted barns)

- Accommodations
  (E.g., bed & breakfasts, farm picnics)

- Outdoor recreation
  (E.g., Horseback riding, hunting, fishing, bird watching)

**AGRITOURISM ENTERPRISE TYPES**

- **Supplementary enterprise**
  - Agritourism as a *minor activity* that supports other products on the farm.
  - *Example:* if the primary enterprise is livestock production, inviting school groups to the farm several days out of the month to learn about animals and farming could supplement income.

- **Complementary enterprise**
  - Agritourism activities *share equal footing* with other enterprises in the farm’s product mix.
  - *Example:* an apple production enterprise on the farm. By selling half of the apples to a wholesaler and the remainder to "pick-your-own" guests, the two enterprises (wholesale & direct market) would be complementary.

- **Primary enterprise**
  - Agritourism as the *dominant/primary activity* on the farm.
  - *Example:* opening a winery on the farm and inviting guests to spend the day or weekend tasting wine. The wine tasting package may include overnight lodging in a cottage on the property. It may also involve producing grapes for the wine on the farm to supplement the wine tasting activities.

THE CURRENT STATE OF AGRITOURISM

FROM 2000 TO 2001, AN ESTIMATED 62 MILLION ADULTS VISITED FARMS AND RANCHES ACROSS AMERICA
-UNITED STATES DEPARTMENT OF AGRICULTURE

IN 2008, ESTIMATED ANNUAL AGRITOURISM INCOME IN THE U.S. VARIED FROM $800 MILLION TO $3 BILLION
-CARPIO, ET AL.
23,350 farms w/ Agri-tourism income

Defined by the Census as: Agri-tourism & recreational services, such as farm or winery tours, hay rides, hunting, fishing, etc.

These stats only tell part of the story!
KEEP IN MIND...THESE STATS ONLY TELL PART OF THE STORY

- Narrow definition of agritourism
  - In 2002, began collected information on ‘recreational services’
  - Hunting & fishing were the only examples given
  - In 2007, expanded to ‘income from agri-tourism & recreational services’
  - Examples included: Farm or winery tours, hay rides, corn maze fees, hunting, & fishing

- Self-identified
  - Respondents self-identified with agritourism/recreational services
  - Many were left out – even though considered agritourism by definition, respondents did not realize/consider themselves as agritourism (consider it more as innovative marketing)

- Direct marketing calculations
  - Value of farm products sold through direct marketing was calculated separately from agritourism and recreation services

- Outdated
  - Stats are from 2002 & 2007
  - Know agritourism has continued to grow across the U.S.
  - But does provide a good starting point to illustrate geographic distribution, growth, and interest of agritourism!

EXAMPLE OF HOW TOURISM & AGRITOURISM ARE BIG BUSINESS

Based on 2006 New Jersey study:

- More than 1/5 of NJ farms offer agritourism
- 43% of NJ total farmland associated with agritourism farms
- Income from agritourism = $57.53 Million
  - Average agritourism income = $27,093 per farm
  - 36% earn 100% of total farm income from agritourism – generally small farms

- Economic linkages: Agritourism generates $33.3 million across other industries

WHY AGRITOURISM?
FARMER/PROVIDER PERSPECTIVE

- Generate additional/new income
  - Often from underutilized resources
- Product line/market diversification
- Keep land in the family
- Employment for family members
- Interest/hobby
- Education of public and customers
- Build neighbor/community relations
- Tax incentives
- Companionship with guests/visitors
Amidst increasing urbanization, farms offer
  - Connection to culture, farm heritage & food
  - Access to fresh, locally-produced products
  - A tie to the land
  - Opportunity to enjoy the outdoors

Family friendly
Increase in weekend/local travel
Want to support agriculture
ECONOMIC & COMMUNITY PERSPECTIVE

- Jobs, personal income, tax revenue
- Preservation of farm-based rural amenities
- Encourages visitation
  - Revenue generated from outside visitors often stays within the local economy (economic multiplier effects)
  - Visitors can influence quality of life – e.g., helping to finance community facilities
- Community events & attractions intended for tourists also benefit & attract local residents
- Defined sense of place/local identity
Agritourism has its downsides and is not for everyone

- Liability exposure
- Intrusion into one’s privacy (for most, the farm is also home)
- Concerns that agritourism “cheapens” the image of farming
- Possible tensions with neighbors and municipalities
- Regulatory/policy issues (e.g., zoning, right to farm protection, deed of easement permissibility)

- New business model for many farmers
  - Increased risk level for capital investments
  - New skill sets required (e.g., hospitality, retail marketing, customer service)
  - Most farmers do not have formal business or marketing plans

From Schilling (2008) – Agritourism Industry Development in New Jersey
AGRITOURISM IS NOT FOR EVERYONE!

HELP FARMERS DETERMINE IF AGRITOURISM IS RIGHT FOR THEM & THEIR FARM.

- Assess Personality
- Assess Goals
- Assess Resources
- Assess Potential
